

# The Circular City Centre - C3

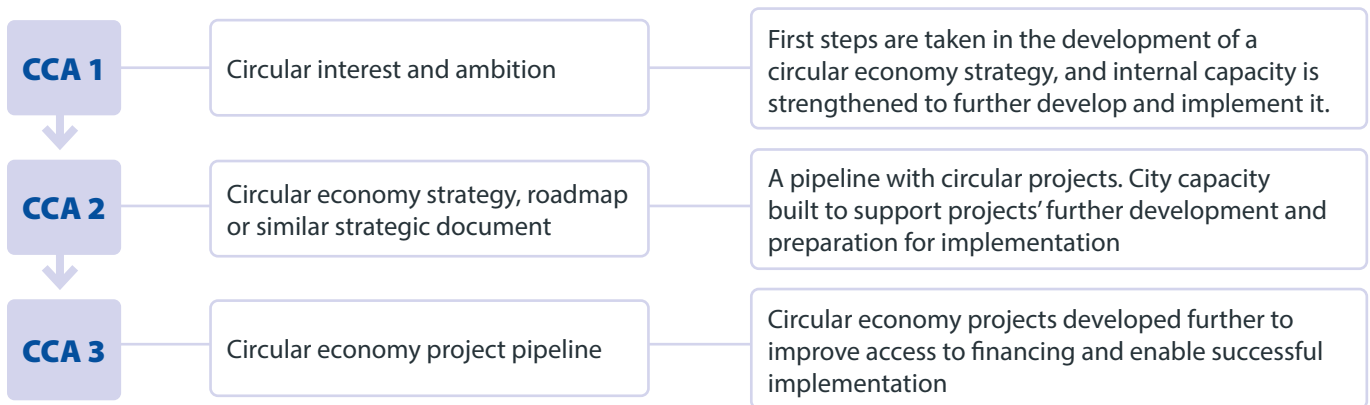

Supporting cities in their circular transition

## Thank you for your interest in the Circular City Centre - C3 and in the Circular City Advisory Programme (CCA).

With this programme we aim to support EU cities in their circular transition, with a particular focus on guiding them in identifying and preparing circular projects towards financing and implementation. You can find more information about the programme on [C3 web page](#).

The Circular City Advisory comprises three different programmes tailored to the level of circular transition achieved by a city, ranging from early-stage exploration of circular principles to preparing circular projects for financing and implementation. The three programmes are outlined below:

More detailed descriptions of each CCA programme is available [here](#).

We kindly ask you to fill in this Expression of Interest form to better understand your city context and make sure we link you with the C3 programme that best serves your needs.

Please send the form or questions or comments you may have on the CCA programme to [C3@eib.org](mailto:C3@eib.org) with "CCA Expression of Interest for *city name*" in the subject line.

The information you provide in this Expression of Interest will be treated in line with the EIB policy on privacy and data protection and will not be used for publication in any form. Further information about how we collect and process personal data is available in this [Privacy Notice](#).

With best wishes,

The EIB C3 team

Supporting cities in their circular transition

1. Your city

2. Your country

3. Your name and function

4. Your email address

5. Does your city have a centralised circular economy coordination unit or a person assigned to coordinate the work of your city on circular economy?

Yes, we have a circular coordination unit
Yes, we have a circular coordination person
Neither of the above

6. If yes, in which municipal department is the unit or person located?

7. Have you identified specific areas or sectors to focus on in the circular transition in your city (e.g. built environment, textiles, food systems, etc.)?

No, we are just starting to get familiar with the topic of circular economy
Yes, we have identified key areas or sector to focus on

8. If yes, which are your key circular priority areas or sectors?

Supporting cities in their circular transition

9. Does your city have a strategy or roadmap for the circular transition?

We are exploring the topic, but have not started preparing a circular strategy/roadmap
We are currently preparing a circular strategy/roadmap
We have a circular strategy/roadmap that has been formally adopted
We have a circular strategy/roadmap and we have started implementing it

10. Has your city identified any circular projects? If not, please move to question 13.

We have no concrete circular projects identified
We have a pipeline with 1-5 circular projects
We have a pipeline with 6-10 circular projects
We have a pipeline with more than 10 circular projects

11. In case your city has circular projects in the pipeline, can you provide a brief description of the project(s), to the extent possible covering the following points: sector, scope, promoter, approximate budget and maturity. For maturity use the following definitions:

- *Conceptual stage, (e.g. early planning, pre-feasibility assessment)*
- *Preparatory stage, (e.g. feasibility assessment, conceptual design)*
- *Advanced stage, (e.g. final design, tender documents)*
- *Under implementation*

12. What is the total investment volume of the city's planned circular projects for the next 3-5 years (capital expenditure only)?

< EUR 20 million
EUR 20 - 50 million
> EUR 50 million
Cannot estimate

Supporting cities in their circular transition

13. Does your city have working experience with grant-funded projects (EU, national)?

Yes. If so, under which programme(s)?
No

14. What are your city's main challenges, and what would help you progress in implementing a circular economy in your city?

15. Which of the three C3 CCA programmes do you think would be most useful and appropriate for your city?

CCA 1: First steps - Prepare and Plan
CCA 2: Next steps - Facilitate and Act
CCA 3: Final steps - Invest and Implement
We have circular projects that are mature enough to progress towards implementation and are therefore interested to learn more about the C3 Circular Project Advisory Programme

16. The C3 usually provides the CCA programmes in English. Does your team have any language limitations for participation in workshops in English or preferences for another language, and if so which language?
